

THE RIGHT SOLUTION FOR EVERY SITUATION

With the Schoenborn configurator.

You do not want a product according to standard specifications, but an individually adapted and therefore personalized product solution? Then benefit from our know-how and test the Schoenborner configurator for shaft linkage and installation fittings for the fittings sector on our website. You'll see, it's easier than ever to find the perfect solution!

YOUR ADVANTAGES

Personalized product solution

The configurator offers you a personalized solution tailored to your task. You create your own product and do not choose from a limited product list. Even special lengths and specific coatings are possible.

Flexible configuration process

Each time information is entered, the intelligent configurator checks the parameters for their realistic feasibility and then suggests suitable product features. The configurator is a helpful assistant with expert knowledge.

Dynamic 3D visualization

During configuration, a growing 3D visualization illustrates the creation process of your personalized product solution. It adapts flexibly to the specified parameters - in real time.

Standardized according to DIN and

The configurator integrates knowledge that is defined in standards, so that your testing effort for planning, conception, design, etc. is reduced to a minimum. The configurator only offers you product features that can actually be implemented and points out any discrepancies.

step-by-step instructions

In order to support the configuration process, product videos are available on our website, which explain the individual steps during the configuration in a comprehensible and understandable way.

And that's how you go about it:

- 1.** Describe your situation to be solved.
- 2.** See how the configurator performs its calculations and combines various product features during this time. On the basis of the information entered, the configurator creates a personalized, but actually realizable solution proposal.
- 3.** View your result in an innovative 3D visualization. When changes are made, the configurator simply adjusts the product solution according to your entered parameters.
- 4.** Send your configured result to us.
- 5.** Receive an attractive offer for your own product.

If you have any questions or require additional information, please contact the person listed below. We will also be happy to advise you on any training requirements regarding the configurator or configuration.

This product sheet is part of the Schoenborner product catalogue. If you would like to file your collected forms in a Schoenborner folder, simply send us an e-mail with your contact details to:
